Dear Mr. Olyphant:

Re: Modification Request for
NPDES General Permit No. ING040002
IDNR Permit No. S- 0222
Peabody Midwest Mining, LLC- Viking Mine
Knox Pit
4421 N. Bicknell Road
Bicknell, Indiana 47512
Knox County

Our office received your Notice of Intent (NOI) submittal on September 19, 2014, requesting modification of the above-referenced general permit coverage. The revision you have requested consist of the reclassification to an alkaline mine drainage status of existing Outfall 009 (currently latitude 38°, 43', 36", longitude -87°, 16', 45", discharging to an unnamed tributary to Indian Creek).

The request has been processed in accordance with Section 402 and 405 of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251, et seq.), and IDEM's permitting authority under IC 13-15. Representatives of the IDNR in Jasonville have verified that the temporary conditions that necessitated a mine drainage status of acid for Outfall 009 are no longer present. Coal removal and soil cover in the areas contributory to the outfall are now sufficient to justify a change to an alkaline mine drainage status. Therefore your petition has been approved in accordance with Indiana Rules promulgated under 327 IAC15-7. Coverage for the facility will now include all outfalls listed on the first table of Attachment 1 to this correspondence.

The NPDES general permit identification number assigned to this facility in the previous approval will continue to apply, as will all other testing and reporting that are required under 327 IAC 15-7 using the forms that were sent to you previously. Should you need additional copies of this form it is also available on the internet at the following web site:

<http://www.in.gov/idem/5104.htm>

327 IAC 15-7 is also available on the internet at the following website:

<http://www.in.gov/idem/4087.htm>

Mr. Jeffrey J. Olyphant

Additionally, you will continue to receive the computer generated preprinted federal NPDES DMR forms. Both the state and federal forms need to be completed and submitted on a routine basis. If you do not receive the preprinted DMR forms in a timely manner, please call this office at (317) 232-8670.

This modification shall become effective on **November 1, 2014**, unless a person aggrieved or adversely affected by the acceptance appeals this decision. Coverage under 327 IAC 15-7 for all remaining outfalls remains effective, and will expire on **October 31, 2015**. In order to receive authorization to discharge beyond the date of expiration, the permittee shall submit such information and forms as required by the Indiana Department of Environmental Management no later than ninety (90) days prior to the date of expiration.

Please note that any person who is adversely affected or aggrieved by approval under the cited NPDES general permit rule may, within eighteen (18) days from the mailing date of this notification, appeal this acceptance by filing a written petition for administrative review with the Office of Environmental Adjudication, in accordance with IC 4-21.5-3-7. This petition constitutes a request for an adjudicatory hearing. The procedure for appeal is outlined in more detail on the attached page.

The Office of Environmental Adjudication will provide parties who request review of this approval with notice of prehearing conferences, preliminary hearings, hearing, and stays or orders disposing of all proceedings. Nonparties may receive such notices without intervening and formally becoming parties in the proceeding by requesting copies of such notices from the Office of Environmental Adjudication.

If you have any questions regarding this letter, please contact Ms. Sheri L. Jordan of our office at (317) 232-8703.

Sincerely,

Catherine Hess, Chief

NPDES General Permit ING040062 - MODIFICATION**

Dear Sir or Madam:

On behalf of Peabody Midwest Mining, LLC, I am submitting the attached modification request for our Viking Mine – Knox Pit NPDES permit ING040062. The drainage status for outfall 009 is requested to be changed from Acid to Alkaline. The mine is currently idled and maintenance of the coal yard has improved the drainage to the sediment basin. Water quality data for the period that the drainage to the outfall has been characterized as Acid is attached. This status change request has been discussed with DNR Reclamation Specialist Brad Loveless. Should you have any questions or comments regarding this submittal, please contact me at our Evansville office, (812) 434-8537.

Sincerely,

A handwritten signature in black ink, appearing to read "J. J. Olyphant".

V. RULE QUALIFICATION:

The purpose of this rule is to regulate wastewater discharges from surface mining, underground mining, and reclamation projects which utilize sedimentation basin treatment for pit dewatering and surface run-off and to require best management practices for storm water run-off.

Does this facility meet these requirements? (please check one) **YES** ☒ **NO** ☐

Please provide a brief description of the facility operation that results in the discharge. You may attach additional sheets.

This facility is a surface coal mine. Stormwater is collected, and passed through sediment treatment structures designed by professional engineers to detain a 10-year-24hour storm event.
